2015 Crow Wing County AIS Plan

Mission:

To provide leadership in preventing the introduction and limiting the spread of Aquatic Invasive Species (AIS) in Crow Wing County by coordinating inspection, decontamination, targeted treatment, and education efforts.

Partners:

Crow Wing County has developed a network of public, private, state and local partners that enables a strategic use and prioritization of resources to combat the spread of AIS in our waters. This plan will continue to build upon this network by coordinating communication tools, training practices and implementation strategies following the best management practices for increasing awareness of AIS and limiting the spread. Key partners include:

- Minnesota DNR
 - Watercraft inspection coordination & training
 - AIS surveys
- University of Minnesota Extension
 - Education & research
- Local Lake Associations & Landowners
 - Volunteers / ambassadors
 - Access usage and inspection scheduling
 - Local knowledge
- Private Sector Businesses
 - Lake service / treatment providers
 - Fishing clubs / guide services
 - o Resorts & Chambers of Commerce
- Cities & Townships
- Neighboring Counties
- Local Law Enforcement Officers
- Schools

Public Input:

This plan was developed with the input of lake associations and concerned citizens during the summer and fall of 2014. A survey was conducted of nearly 200 lake association members seeking input on AIS activities and funding priorities for 2015. Representatives from 24 lake associations and over 50 individuals responded. The survey identified watercraft inspections, education/awareness, and decontamination as the top priorities. Complete results of the survey are included in Appendix 1. Additional feedback was gathered at public meetings, including: annual Crow Wing Lakes and Rivers Alliance (LARA) meeting on August 26th and an AIS Roundtable co-hosted with the Whitefish Area Property Owners Association (WAPOA) on September 19th.

Plan Activities:

The 2015 allocation of State AIS funds (~\$450,000 + carry over from 2014) is proposed as follows:

- Watercraft Inspections using DNR trained Level I inspectors = \$295,000 +/-
 - Inspection hours (inspectors provided by Brainerd's Employment Resource Center)
 - Training and equipment for inspectors
 - Training for private landing operators (resort staff, etc.)
 - Usage counters (cost-share with participating lake associations)
 - CWC oversight and coordination

Watercraft inspection hours are allocated based on the risk classification map, which was developed based on each access' overall usage, proximity to AIS infested waters, and infested status. Carry-in accesses are not identified in this plan. Local associations and others are charged with identifying and managing these landings. If desires, lakes can pursue electronic monitoring systems in lieu of inspection hours.

Risk Level	# of Landings (suitable for boats)	Risk Basis	2015 Plan
Very High	26	Large, heavily used landings on or very near infested waters	County-provided inspectors; 400 hours per landing
High	24	Well used landings on mid-sized lakes, further away from infested waters	County-provided inspectors; 200 hours per landing
Moderate	43	Generally public landings with sporadic use	Generally no county inspectors; reliance on volunteers & education / awareness
Low	90	Little used public or private landings	Education / awareness only; training offered for private landing operators

- Decontamination for treating zebra mussels = \$100,000 +/-
 - Level II inspection hours, approximately 24 hours/week for 17-18 weeks
 - Training and equipment for inspectors
 - Reimbursement for private sector inspections
 - Up to 5 decontamination units (will use existing unit in Emily)
 - CWC oversight and coordination

Crow Wing County will provide a networks of semi-permanent decontamination stations strategically located throughout the County. In addition, this plan seeks to encourage the establishment of decontamination units in private sector locations by partially subsidizing private-sector Level II inspections.

- Education & Awareness = \$45,000 +/-
 - Lake association public awareness campaigns (\$250 per lake with a boat landing)
 - Signage at non-DNR landings
 - o Print media (Rack cards, newspaper ads, stickers, posters, etc.)
 - o Targeted advertising (TV, online, billboards, and/or radio PSAs)
- Milfoil Treatment = \$40,000 +/-
 - Treatment and related surveys for control of milfoil on infested lakes with a public access
- Innovation/ Special Projects = \$10,000 +/-
 - Zebra mussel veliger sampling (CWC to pay for lab costs, associations would sample)
 - o Pilot & special projects, such as boat tagging system, electronic entry, etc.
 - o Rapid response (treatment for new milfoil infestations, etc.)

Other activities not mentioned above may be undertaken to prevent the introduction of AIS or to limit the spread at the discretion of the Crow Wing County Land Services Department.

Proposed 2015 CWC AIS Budget - Tentative

Inspection			
Level I Inspection Hours	\$231,173	400 hrs for very high risk, 200 for high risk	
Equipment	\$2,000	Vests, etc.	
Flag signs at landings	\$7,000		
Tablets	\$7,000	~\$135/tablet (inc. charger/case)	
DNR training for County Inspectors	\$5,000		
DNR training for private landings	\$5,000		
Usage Counters (CWC owned)	\$2,300	3 counters + initial setup	
Access Usage Counters, 50/50 cost-share (lake association owned)	\$5,000	25 counters @ \$200	
County Staff Coordination	\$30,000	Mitch + seasonal coordinator (+ Mileage)	
Total Inspection	\$294,473		

Decontamination		
Level II Inspection Hours	\$50,000	24 hours/site for 18 weeks
Level II Inspection Training	\$1,200	10-12 inspectors
Private Sector Level II Inspection Reimbursement	\$5,000	
3 permanent decon stations	\$30,000	Includes setup & unit for CWC water patrol
Fuel	\$2,500	Vehicle gas + propane/gas for units
Signage, stickers/tags for decon inspections	\$1,300	
County Staff Coordination	\$10,000	Seasonal Assistant (+ mileage)
Total Decontamination	\$100,000	

Education & Awareness	Amount	Notes
Lake Association Marketing	\$12,500	\$250 per lake w/ boat access
Signage - 50 Small Signs	\$11,500	Non-DNR landings: design and production
Signage - 15 Large Signs	\$8,200	Non-DNR landings: design and production
Public Awareness - Print Media	\$2,500	Poster, rack cards, stickers, etc.
Targeted Advertising	\$10,000	Targeted TV, radio, and online content
School Education/Curriculum	\$300	
Total Education & Awareness	\$45,000	
Milfoil Treatment		
		8 Eligible Lakes:
DND b. Proceeds and a	ć 40.000	Bay, Clearwater, Emily, Kimble, Lower Mission,
DNR-approved treatment & related surveys by licensed experts	\$40,000	Ossawinnamakee, Upper Mission, Ruth
Innovation / Special Projects		
Zebra Mussel Veliger Monitoring	\$5,000	Lab costs for sampling of 50 non-infested lakes
Zesta Massel Venger Montesting	φ3,000	Possible activities include: boat identification/tagging
Other projects	\$5,000	system, rapid response
Total Innovation / Special Projects	\$10,000	, , , , , , , , , , , , , , , , , , , ,
Balance forward from 2014	\$34,000	
DNR LGU Grant Funds (estimated)	\$5,000	Estimated amount (application open until Feb. 17)
2015 Total Budget	\$489,473	\$450,473 from 2015 State Allocation

Appendix 1: AIS Funding Survey Results

#1: Rank preference for how County should prioritize funding

Overall ranking:

- 1. Watercraft Inspections
- 2. Education/Awareness
- 3. Decontamination Program

- Research funding, testing for use of eradication chemicals
- Centralized decontamination and inspections- not enough inspectors to do inspections on each lake. Right now only lakes that have the funds to do an inspection program are involved; other lakes should not be left out of benefit because they don't have funds or manpower. Focus on infested water bodies first.
- Restricting access hours at DNR accesses
- Fairer distribution of funds,
- Zebra mussels
- State exam on AIS prevention prior to watercraft registration renewal

#2: Rank preference for how County should administer funding

Overall ranking:

- 1. Allocate funds and inspection hours directly to lake associations
- 2. Administer a competitive grant application
- 3. Allocate funds to a regional coalition of lake associations

- Stricter enforcement of violators
- Give more money to lakes that are not infested to help them stay that way. Do not penalize lake associations or LID's that have been working hard to protect their lake's water quality
- Spread money out evenly. Especially include the lake asso/LIDS that have spent so much of their own money fighting invasive species.
- Divide fairly.
- Emphasize prevention on lakes that not infected yet

#3: Rank preferred method for allocating watercraft inspection

Overall ranking:

- 1. Preference given to lakes without milfoil or zebra mussels
- 2. Proximity to other infested waters
- 3. Tie: # of boat lands open to the public / Overall use of the landings

- Stricter enforcement
- · Preference to lakes with milfoil and zebra mussels
- Focus on inspecting boats coming off of infested waters in the county first, then boat coming to uninfested lakes from infested lakes.
- Preference given to lakes with milfoil or zebra mussels to control and prevent spread
- priority to larger lakes than are not infested to reduce potential future treatment if/when infested

#4: Provide level of interest in partnering with CWC, SWCD, local city/township, etc.

Overall ranking:

Tie: CWC only / SWCD
 Local city or township

- Stricter
- As Lake Improvement District is Local Government Unit we are best equipped to administer program.
- Question poorly worded. Is meaning "must do inspection program" if assn. is given funds?
- Working either with the County or local township or City is fine.

#5: Rank preference regarding proximity of decon station to your lake

Overall ranking:

- 1. Prefer one at landing
- 2. Within 5-10 minute drive
- 3. Within 10-30 minute drive

- Problem is they don't get used when right at the access
- Bay Lake IA is undecided on this issue
- We, Ruth Lake already own a decontamination Unit
- Priority to infected lakes with highest access use
- Decontamination station is useless unless it is at each lake and usage is mandatory

#6: Rank preference of who should manage a decon station

Overall ranking:

- 1. Crow Wing County
- 2. DNR
- 3. Some Combination of all options

- County should hire employees to man the stations; consider hiring seniors, they are more stable than youth.
- Ruth Lake already operates decontamination unit with 4 Level 2 Inspectors.

#7: Who should pay for operation of decon stations

Overall ranking:

- 1. Some combination of all options
- 2. Crow Wing County
- 3. Other (assuming State/DNR)

- If the county receives the state funds, they should pay for the operation.
- AIS Grant money
- If these are set up the organization responsible needs to insure long-term funding for operation.
- State Of Minnesota
- Cost of Level 2 Inspectors should be paid by Crow Wing County
- State of MN
- MN DNR in combination with local and county

#8: Ideally, how much education/awareness funds would your association spend annually:

#9: Provide any other feedback:

- We need research how to eliminate AIS instead of putting a bandaid on the problem. Elimination of the AIS would save the state moneys.
- A great start to programs that should have been in place years ago.
- This was a very poorly designed survey; it was pre-directed and assumes that localized inspection programs and decontamination are the only choices for spending the AIS funds. Our association advocates that the county do strategic planning of a 3-5 year plan for use of the money, not a short-sighted, one-year-at -a-time approach. Without adequate planning, involving stakeholders, there will not be a good return on investment.
- Feel that money spent should be prioritized towards inspection hours rather than decontamination stations.
- AIS funds spent at the local level cannot protect local lakes from AIS because there is no local authority to restrict usage of lakes to decontaminated boats.
- Able to use funds to pay for a Decon. unit or part of it. Funding for Level two and one inspectors. Lake Assoc or LID's that have shown the initiative to purchase a Decon, unit on their own to control AIS.
- The Lower Hay access is the major access for the west end of the Whitefish Chain. Most of the boaters use it to get to Whitefish and beyond.

- Knowing what the County program will be for 2015 by the fall will help us plan better for 2015.
- Please let Lake Associations/LIDS have a voice in how the money is spent/allocated. The Lake Associations/LIDS know best where they are spending and falling short of funds.
- I am convinced zebra mussels will be in all lakes no matter what we do. Milfoil and curly leaf might be manageable.
- The challenge is getting as much of the money directly applied to working the issue and as little to the administration of the program. This means it has to get down to the Lake Associations but how you allocate is a challenge.
- attempt to stop the transfer from the infested lake limit the access hour to/from infested lakes to the availability of access monitors
- Bay Lake IA is also undecided on whether or not to develop an education/awareness program.
- I do not feel that the money should just go to the larger resort lakes. Many of those are already infested. Also when someone is caught violating the law they should be tagged, not just warned. The DNR has done a great job of making people aware of the laws related to transporting boats with the plugs in. People need to be held accountable
- Provide more funding for lake associations to battle ais. Thank You
- AIS funds are needed for as long as it takes to keep our lakes and rivers clean and prevent any further infestation. Decontamination is a necessary preventative tool and we intend to operate 7 days a week.
- The lake associations & LIDs that have spent thousands of their own money over many years are being overlooked.
- Provide fresh water at the access so that bait containers can be dumped and filled prior to entering and leaving the lake.
- Lower South Long Lake only got \$250??? That's not fair representation at all!
- The grant funds were appreciated to be able to have inspectors at the public access. Some educational seminars for resorts and associations is needed.

- Inspection programs are not the answer. Lakes spending \$ on them have become infested anyway. We need to jointly brainstorm ideas for AIS control and prevention. Lake assns. spending their own \$ on AIS treatments should receive some of the future funds. We spent \$38,000 just this year to treat curlyleaf pondweed in our 3 lakes. The \$9,100 in DNR grant funds helped a little. \$ from the State via the County would also help us keep public waters open for public recreation.
- Most of the battle is lost in Rice Lake. If we get Asian carp, it is entirely lost.

10: Optional, provide the name of your association

- HLPOA-Horseshoe Lake Property Owners Association
- Gull COLA
- Placid Lake area Association
- Kimble Lake Improvement District
- Mission Lakes Association
- Bass Lake Association
- Gladstone Lake Association
- Ruth Lake Improvement District
- Friends of Lower Hav
- Rice Lake Lake Association
- WAPOA and PRWA
- PLA and PLCC
- Bay Lake IA/Phillip Rollins
- Perch Lake Conservation
- Lower South Long Lake Improvement Assoc (LSLLIA)
- Lower south long lake
- Lower South Long Lake Improvement Association
- Lower South Long Lake
- Upper South Long Lake
- Lower south long lake
- Lower south long lake
- Lower south long lake association
- Ruth Lake Improvement District
- Fifty Lakes Property Owners Assoc.
- South Long Lake (Lower)
- Upper Hay Lake Association
- Lower South Long lake
- Lake Edward Conservation Club
- Cullen Lakes Association
- Pelican Lakes Association
- Rice Lake Association

APPENDIX 2 - Proposed 2015 Level I Inspection Hours by Lake

	2014	Proposed 2015	% Change
	Allocation	Level I Hours	% Change
Pelican (3 landings)	350	1200	242.9%
