

NOTICE

The Lake Alexander Lake Improvement District – 2019

The LALID Board of Directors would like to inform property owners on Lake Alexander that we have applied for a permit which would allow us to treat for the Invasive Species of Curly Leaf Pondweed and Eurasian Water Milfoil within 150 feet setback.

A total of two treatments are planned which would occur during the months of May to August 2019. The method of control for CPL being used is Aquathol K; the method of control for EWM being used is Triclopyr, or 2,4-D or both. All products are EPA and MDA Registered Aquatic Herbicides.

Shoreline property owners may request that control not occur adjacent to the landowner's property within 150 feet of shoreline. If you desire that the treatment not occur adjacent to your property, please provide your name, property address, and notify the LALID at the following address: Dr. Bill Faber, LALID 7427 Cottonwood Drive, Cushing, MN 56443; or by E-Mail at LakeAlexLID@gmail.com
